

■ Line Bar Type UV LED Curing System

Slim type UV LED curing system improves the curing quality and increases the working speed remarkably based on the high strength UV output and high stability. Designed in an unlimitedly extendable structure in a module unit, an installation optimized for the site condition is possible.

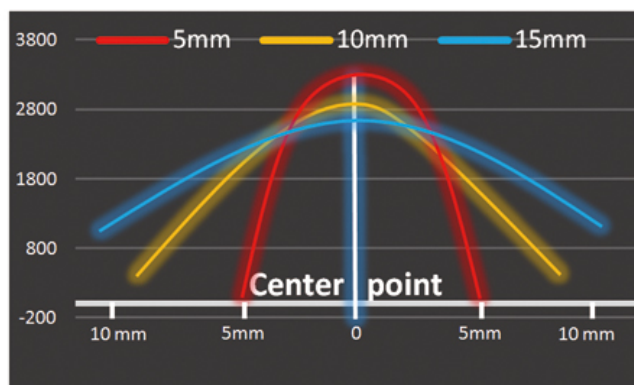

Item	Specification
UV Wavelength	365, 385, 395, 405(nm)
LED Spec	COB Package
UV irradiation	3500 mW/cm ² [Maximum]
Cooling Method	Fan, CDA
Longitudinal Uniformity	± 10%
Irradiation distance	4~10 mm

※ The product specification can vary upon customer request.
